

SIMPLE BUDGET ORGANIZER

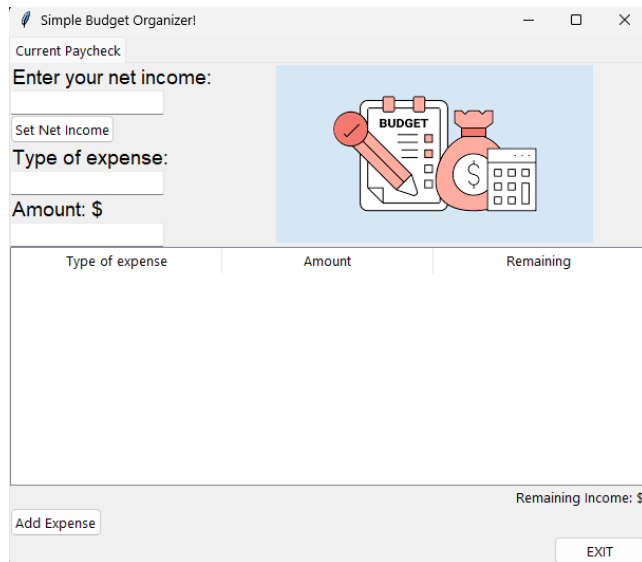

Tkinter Project in Python

Kizzie Trinh

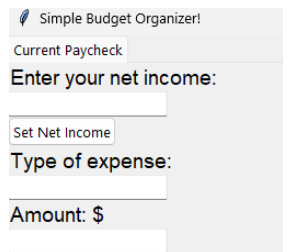

User Manual

To use this “Simple Budget Organizer” is simple and easy to use. Just follow the instructions below:

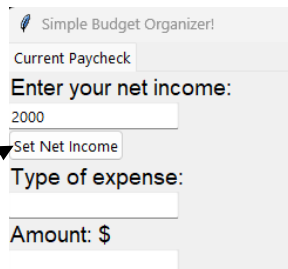

The screenshot shows the 'Simple Budget Organizer!' application window. It has a title bar with standard window controls. The main area is divided into two sections. The top section is for entering paycheck information, with fields for 'Current Paycheck', 'Enter your net income:', 'Set Net Income', 'Type of expense:', and 'Amount: \$'. To the right of these fields is a blue box containing an illustration of a budget sheet, a money bag, and a calculator. Below this is a table with three columns: 'Type of expense', 'Amount', and 'Remaining'. At the bottom right, it says 'Remaining Income: \$'. There are 'Add Expense' and 'EXIT' buttons at the bottom.

1. This is what your screen should show up once you run the program.

This is a close-up of the input fields in the 'Simple Budget Organizer!' window. It shows the 'Current Paycheck' label, the 'Enter your net income:' label, and the 'Set Net Income' button. Below that is the 'Type of expense:' label and the 'Amount: \$' label.

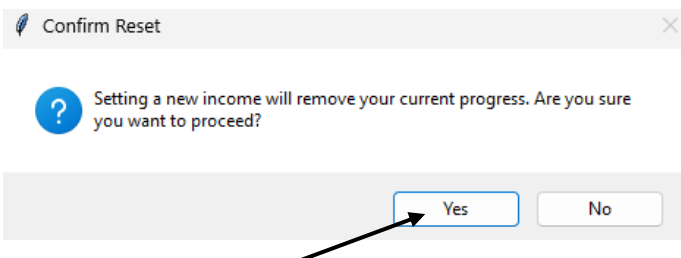

2. This section is where you would put in your paycheck information such as what your paycheck was, the type of expense you're paying out of your check, and the amount that the paycheck expense cost.

This screenshot shows the 'Simple Budget Organizer!' window with the 'Set Net Income' button highlighted by a black arrow. The 'Enter your net income:' field now contains the number '2000'.

3. Once you have entered your paycheck amount, you'll want to click on the “Set Net Income” button below the amount you have entered.

4. This message box will appear once you have clicked on the “Set Net Income” button. You would want to click “YES” to set your income to the amount you have written in the line. This allows the expense to be subtracted from your total income from that paycheck.

This screenshot shows a 'Confirm Reset' dialog box. It has a title bar and a question mark icon. The text inside says: 'Setting a new income will remove your current progress. Are you sure you want to proceed?'. At the bottom, there are two buttons: 'Yes' and 'No'. A black arrow points to the 'Yes' button.

5. Once you have clicked on “YES” you're ready to enter your expenses.

Simple Budget Organizer!

Current Paycheck

Enter your net income:

2000

Set Net Income

Type of expense:

Amount: \$

Type of expense	Amount	Remaining
House	1000.0	1000.0
Dog	100.0	900.0
Phone	101.0	799.0
Utilities	140.42	658.58

Remaining Income: \$658.58

Add Expense

EXIT

6. Once you have entered your expense and the amount you want to click on "ADD EXPENSE" This will add it to the table.
7. The column "Remaining" shows what you have left from the income you had initially set in the beginning. Each time you enter an expense, this remaining will be updated as what you currently have left.
8. Then at the very end of the table to the lower right, above the "EXIT" button is another remaining amount section. This is easy to look at if you have a lot of expense in the table, you can just glance at the "Remaining Income" and see what you have left.

Simple Budget Organizer!

Current Paycheck

Enter your net income:

1500

Set Net Income

Type of expense:

Amount: \$

Type of expense	Amount	Remaining
House	1000.0	1000.0
Dog	100.0	900.0
Phone	101.0	799.0
Utilities	140.42	658.58

9. If you want to enter a different income amount, you will enter the amount you want and click on the "Set Net Income" button again.
10. Again, the message box pops up again asking if you are sure because the expense in the table will be erased when you set the new income amount.
11. At this time you will repeat steps 3-6 to add your expenses.

Confirm Reset

Setting a new income will remove your current progress. Are you sure you want to proceed?

Yes No

Simple Budget Organizer!
